

The leading full - range supplier for wood connection systems

The lifting clamps PowerClamp II D40/90

Lifting Clamp

PowerClamp II D40/90

Power Clamp II D40/90 - the latest innovation in timber construction. Enables you to lift wooden beams and massive edge glued panels. Easy and effective - drill, apply, lift!

PowerClamp II D40/90

- Major time savings
- No other lifting gear needed
- No damage of wood surface
- No soiling
- High security: release only tension free

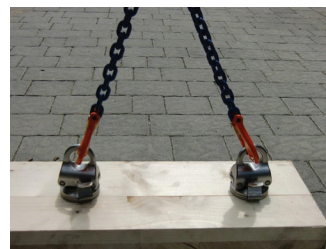

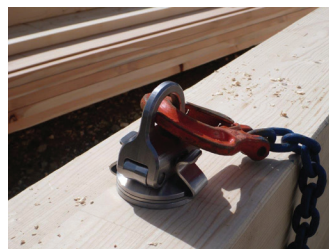

With only 1.8 kg the robustly designed PowerClamp II D40/90 is your optimal partner when it comes to lift formwork girders up to 1 ton.

Application

Application is easy as can be. A drill-hole size of just 40 mm is sufficient. Insert the PowerClamp and start to lift.

Scope of supply

- 2x PowerClamp II D40/90
- 1x Drill (40 mm)
- 1x High quality transport box
